The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With regard to claims 1 and 8, line 4, how does a plane encircle a roller? It is impossible for a plane to encircle anything.

With regard to claims 1 and 8, line 6, it is not clear whether "each row" as claimed is the same row as claimed in line 5.

With regard to claim 6, there is no antecedent basis for "said straight lines".

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Sato (US 3,833,162).

Art Unit: 3725

With regard to claim 1, Sato discloses a feed device capable of use with a hammermill including:

- 1. a generally cylincrical feed roller (Figure 4);
- a plurality of gripper teeth in rows extending from a left and right lateral edge of the feed roller (Figure 4);
- 3. each of the rows angled to be non perpendicular (Figure 4); and
- 4. the angle of the rows on the left side being equal and opposite to the angle of the rows on the right side (Figure 4).

With regard to claim 2, Sato discloses generally parallel rows (Figure 4).

With regard to claim 4, Sato discloses rows extending from the left and right lateral edges substantially to a center (Figure 4)

With regard to claim 5, Sato discloses a non-congruent center portion of gripper teeth rows (Figure 4)

With regard to claim 6, Sato discloses rows of teeth angled 30 to 60 degrees (Figure 4).

With regard to claim 7, Sato discloses rows of teeth in a direction not parallel to a line extending radially from the longitudinal axis of the feed roller (Figure 4).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sato (3,833,162) in view of Hutchinson et al. (US 3,045,728).

Claim 8 calls for non-uniform teeth heights. In a closely related art, Hutchinson discloses a feed device with non-uniform teeth heights in order to better grip feed material. Therefore, it would have been obvious to one skilled in the art at the time the invention was made to provide Sato with non-uniform teeth heights in order to better grip feed material, as taught by Hutchinson.

With regard to claim 9, Hutchinson's gripper teeth are already configured in a repeating pattern of relatively smaller teeth and relatively larger teeth (Figure 1).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason Y. Pahng whose telephone number is 571 272 4522. The examiner can normally be reached on 9:00 AM - 7:00 PM, Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Derris Banks can be reached on 571 272 4419. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
